

SloanAcademics

Every child's success is different.

MIDDLE SCHOOL SERVICES

One-on-One Tutoring

SPECIALIZED

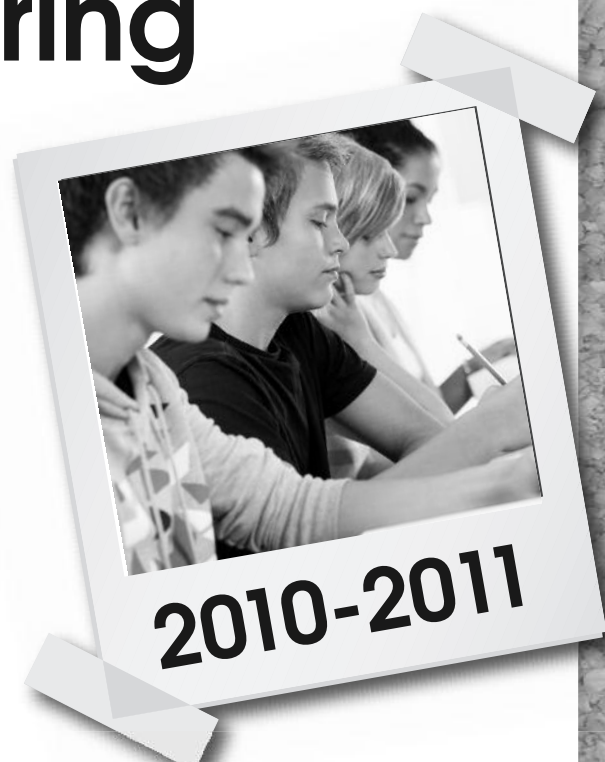

This type of tutoring is designed to offer reading instruction for students with learning disabilities or who need intensive phonemic awareness training. We have tutors who are trained in the Multi-Sensory Language Approach (Orton Method) or the Wilson Reading Method.

READING, WRITING & MATH

Our reading specialists and certified teachers can help develop a tutoring program that will address specific skills that need extra reinforcement. We will work directly with your child's teachers to ensure that our instruction has a positive impact on your child's classroom performance. Our instruction corresponds to the local and state curriculum.

STUDY SKILLS & LEARNING STRATEGIES

We have an 8-session Learning Strategies course to help students improve study skills. We help students improve time-management, organizational, note-taking, and test-taking skills, as well as textbook reading comprehension. Scheduling is flexible and tune-up sessions can be scheduled as needed after the course.

2010-2011

Educational Testing

Does Your Child Have Academic Struggles?

Dr. Sloan has 20 years of experience in the local community helping parents identify the source of learning problems in their children.
